

KRISHNAKANT MISHRA

Software Engineer | AI/ML | Generative AI

+91-7000846218 | mishrkrishnakant050@gmail.com | [LinkedIn](#) | [GitHub](#) | Indore, MP, India

PROFESSIONAL SUMMARY

Results-driven Software Engineer with strong expertise in software development, data science, and machine learning. Proficient in Python, SQL, Java, Data Structures & Algorithms, Core computer Science and building scalable backend applications using FastAPI and Docker. Experienced in data analysis, predictive modeling, data visualization, and developing end-to-end data-driven solutions. Skilled at translating complex datasets into actionable insights while designing efficient and maintainable software systems. Passionate about leveraging software engineering and data science to solve real-world problems and contribute to high-impact technology teams.

EDUCATION

Master of Computer Applications (MCA) — AI/ML | Oriental University, Indore

2024 – 2026 | CGPA: 8.0

TECHNICAL SKILLS

Programming Languages: Python, Java (DSA), SQL

AI / ML & GenAI: Machine Learning, Generative AI, Neural Networks, Model Fine-tuning, RAG

MLOps & Deployment: MLOps, Docker, FastAPI, CI/CD Pipelines, AWS(s3)

Tools & Platforms: Jupyter Notebook, Git, GitHub, VS Code, Linux, Pytorch, Hadoop

Databases: MySQL, PostgreSQL, Vector Databases (FAISS,)

Soft Skills: Problem Solving, Research Acumen, Agile Collaboration, Technical Communication

INTERNSHIP EXPERIENCE

Data Science Intern — Ypsilon IT Solutions, Indore

2025 – 2026

- Worked on real-world data science projects involving data preprocessing, feature engineering, and model building using Python and ML libraries (Pandas, NumPy, Scikit-learn, FastAPI, Streamlit).
- Gained hands-on exposure to end-to-end ML workflows: data collection → EDA → model training → evaluation → deployment readiness.
- Collaborated with the development team on data-driven solutions, enhancing analytical and problem-solving skills in a professional environment.

PROJECTS

AI Optimiser for Kyber (Post-Quantum Cryptography)

Tech Stack: Python, Machine Learning, FastAPI, Docker, CRYSTALS-Kyber (PQC)

[Project link](#)

- Designed and implemented an AI-driven optimisation framework targeting the CRYSTALS-Kyber post-quantum key encapsulation mechanism (KEM), a NIST-standardised algorithm resistant to quantum attacks.
- Leveraged machine learning models to analyse and optimise parameter selection within Kyber's lattice-based cryptographic operations, reducing computational overhead.
- Built a Streamlit-powered interactive interface to expose optimisation workflows, enabling visual exploration of cryptographic systems and benchmarking results.

CERTIFICATIONS

Python for Machine Learning — Universal Informatics, Indore

- Completed a comprehensive, hands-on certification covering Python programming fundamentals applied to machine learning workflows, including data manipulation with NumPy/Pandas, supervised and unsupervised learning algorithms, model evaluation techniques, and practical implementation using Scikit-learn. Gained practical skills directly applicable to real-world ML engineering tasks.
