

KRISHNAKANT MISHRA

Data Scientist | GenAI Model | ML and Risk Management

+91-7000846218 | mishrkrishnakant050@gmail.com | [LinkedIn](#) | [GitHub](#) | Indore, MP, India

PROFESSIONAL SUMMARY

Analytically driven AI/ML and Data Science graduate with hands-on experience across the model lifecycle — data preprocessing, model building, evaluation, and benchmarking — using Python, SQL, and modern ML/GenAI tooling. Experienced in assessing model performance, robustness, and computational trade-offs, with practical exposure to Generative AI, RAG pipelines, and model fine-tuning. Strong foundation in structured documentation, research-driven analysis, and clear technical communication, with growing interest in Generative AI oversight and model risk assessment. Comfortable collaborating cross-functionally and translating technical findings into clear, actionable insights for stakeholders.

CORE & TECHNICAL SKILLS

AI/ML & GenAI: Machine Learning, Generative AI, Neural Networks, Model Fine-Tuning, RAG, Model Evaluation & Benchmarking

Model Risk-Relevant Skills: Performance Analysis, Robustness & Trade-off Assessment, Structured Documentation

Programming & Data: Python, SQL, Java (DSA), Pandas, NumPy, Scikit-learn, PyTorch

MLOps & Deployment: MLOps, Docker, FastAPI, CI/CD Pipelines, AWS (S3)

Databases & Tools: MySQL, PostgreSQL, Vector Databases (FAISS), Jupyter, Git, GitHub, VS Code, Linux, Streamlit

Soft Skills: Structured Thinking, Technical Communication, Agile Collaboration, Stakeholder-Ready Reporting

INTERNSHIP EXPERIENCE

Data Science Intern — Ypsilon IT Solutions, Indore

2025 – 2026

- Performed data preprocessing, feature engineering, and model building using Python and ML libraries (Pandas, NumPy, Scikit-learn, FastAPI, Streamlit), supporting evaluation of model performance and output quality.
 - Worked across the end-to-end ML workflow — data collection, EDA, training, evaluation, and deployment readiness — gaining exposure to how model assumptions and design choices affect outcomes.
 - Collaborated with the development team on data-driven solutions and documentation, strengthening structured analysis and cross-functional communication.
-

PROJECTS

AI Optimiser for Kyber (Post-Quantum Cryptography) – [Project Link](#)

Tech Stack: Python, Machine Learning, FastAPI, Docker, CRYSTALS-Kyber (PQC)

- Designed an AI-driven optimisation framework for the CRYSTALS-Kyber post-quantum key encapsulation mechanism (KEM), a NIST-standardised, quantum-resistant algorithm, evaluating parameter choices against performance goals.
 - Applied ML models to optimise parameter selection within Kyber's lattice-based operations, benchmarking computational overhead and documenting trade-offs between efficiency and security.
 - Built a Streamlit interface exposing optimisation workflows for visual exploration and reporting of benchmarking results to technical and non-technical audiences.
-

EDUCATION

Master of Computer Applications (MCA) — AI/ML | Oriental University, Indore | 2024 – 2026 | CGPA: 8.5

CERTIFICATIONS

Python for Machine Learning — Universal Informatics, Indore

Covered Python for ML: NumPy/Pandas, supervised & unsupervised learning, model evaluation, Scikit-learn.
